

Scientific Method Applied Project

PLANNING

TASK. On large paper, after brainstorming, propose 3 tests you and your partner will complete to determine the best facial tissue available at the HonkerScience Variety Store (aka, our lab)

Part 1: Brainstorm

List 10 reasons to choose a particular product over another one that you COULD test in our lab

PART 2: Experimental Design

1. On large paper draw, design, including steps, 3 minimum experiments you would complete to test your products. Detail enough to hand off to another team member and they would get the same results. You will PITCH this set of experiments to the class.
2. Present this plan to your experimental team (class) on _____

Experimental Design approved _____
